WHEREAS, Fairview City owns and operates a municipal electric utility system providing electric service to customers within the Fairview City limits and within its service area outside the city limits; and

WHEREAS, the Utah Associated Municipal Power Systems (UAMPS) has reported that the average cost of power may increase by approximately twenty-five percent (25%) with the implementation of the new Extended Day Ahead Market (EDAM); and

WHEREAS, a prior rate study recommended that Fairview City increase its electric rates, finding that without such action the Power Department would barely break even or operate at a deficit, and other local power departments have already adjusted their rates in response to EDAM; and

WHEREAS, the City Council of Fairview City finds that an adjustment to the electric energy charges is necessary to cover the increased cost of power supply, materials, maintenance, and labor, and to protect the public health, safety, and general welfare of the citizens of Fairview City;
